

INTELLIGENT UNDERCARRIAGE SCANNER SUPPORTS SUPER BOWL

Sterling, Virginia, February 15, 2019 – Gatekeeper Security, (Gatekeeper) announced today that it successfully deployed the Industry first **Relocatable Intelligent Train Undercarriage System (RITUS)**, at the Metropolitan Atlanta Rapid Transit Authority (MARTA) rail yard.

“Gatekeeper is very proud to have worked with MARTA to successfully deploy our Intelligent Train Undercarriage scanner to support such an important event. The Super Bowl is the single largest sporting event in the world and it brings with it a heightened level of attention regarding safety and security. Gatekeeper’s optical scanning solutions are leading the industry in both speed and accuracy for Vehicle and passenger scanning, as well as Rail scanning solutions”, said Chris Millar, President and CEO at Gatekeeper Security, Inc.

“Public transit systems like MARTA continue to work hard to avoid the risks associated with being an open transit system. We must be diligent and proactive to prevent all types of hazards on a daily basis,” said MARTA Police Chief Wanda Y. Dunham. “We constantly have to find new ways to detect and deter threats to protect our riders. This technology was just one example of our layered security approach to safety and security.”

“Gatekeeper Security is Leading the way in providing intelligent optical inspection and recognition technology solutions to help secure people and property, identify threats, and provide real-time actionable intelligence quickly and accurately., said Erin Phelps, Managing Director North America. “Gatekeeper solutions support Government and Commercial safety and security challenges around the globe.”

About Gatekeeper Security:

Gatekeeper designs and manufactures intelligent optical inspection technologies that automatically identify and authenticate vehicles, occupants, license plates, and locate anomalies associated with a vehicle undercarriage. Gatekeeper’s technologies are widely deployed by many governments and Fortune 500 clients worldwide to protect people, property, military installations, government agencies, borders, and critical infrastructure assets.
